TITLE: FOOD/FEED SAFETY POLICY				

1. Purpose Statement and Targets

At Natural Remedies Pvt. Ltd., we recognize that ensuring food and feed safety is a critical aspect of our responsibility to customers, animals, and society. As pioneers in phyto-genic solutions, we are committed to delivering safe, residue free, and high-quality products by eliminating contamination risks throughout our operations. Our policy reflects our long-term vision of advancing health and wellness through natural and scientific innovation. Our key targets are to achieve 100% compliance with all relevant food and feed safety regulations, continuously improve our quality assurance systems, and contribute to global food security through sustainable nutrition practices.

2. Framework and Standards Used to Draft the Policy

This policy has been developed in alignment with internationally recognized frameworks and best practices, including ISO 22000, HACCP principles, FSSAI (Food Safety and Standards Authority of India) regulations, BIS guidelines, and Codex Alimentarius standards. It also reflects our internal quality systems, which are closely integrated with our risk management and sustainability commitments. These frameworks form the backbone of our proactive and preventive approach to food and feed safety.

3. Stakeholder Applicability

The scope of this policy covers all employees and departments involved in production, R&D, quality assurance, procurement, warehousing, and logistics. It also applies to all external stakeholders in our supply chain, including suppliers, contract manufacturers, service providers, transporters, and distribution partners across both domestic and international markets. Each stakeholder plays an important role in upholding the safety, quality, and integrity of the products we deliver.

4. Roles and Responsibilities

Clear roles and responsibilities have been defined to support the successful implementation of this policy. The leadership team is responsible for providing direction, allocating resources, and ensuring oversight. The quality and regulatory teams are tasked with maintaining adherence to safety protocols and applicable laws. The procurement team ensures that raw materials are sourced only from approved and compliant suppliers. All employees are expected to follow standard operating procedures, maintain hygiene protocols, and report any risks or non-compliances. Our training and HR functions ensure all personnel and service partners are well-informed and equipped to uphold food and feed safety standards.

5. Implementation Process

This policy is operationalized through the deployment of certified management systems and robust procedures across all critical points in our supply chain. We implement ISO and HACCP systems, conduct supplier audits and approvals, enforce the use of safe raw materials, and follow stringent hygiene protocols in processing, storage, and transport. Documented SOPs ensure traceability and accountability across departments. Regular training and cross-functional collaboration further strengthen policy execution and alignment.

6. Monitoring Mechanism

Our performance on food and feed safety is closely monitored through regular internal and external audits, the tracking of key performance indicators (KPIs), and the use of Corrective and Preventive Actions (CAPA) for any deviations. Safety metrics such as contamination rates, compliance audit scores, and recall incidents are reviewed periodically by the management team. Monitoring efforts are geared toward continuous improvement and risk mitigation.

TITLE: FOOD/FEED SAFTY POLICY				

7. Signing Off Authority

This policy has been reviewed and formally approved by the Managing Director of Natural Remedies Pvt. Ltd. The leadership's endorsement reflects our company-wide commitment to food and feed safety and accountability at the highest level

8. Policy Review

The policy will be reviewed annually or earlier in the event of significant operational changes, regulatory updates, or newly identified risks. All updates will be approved by the leadership team and communicated across all internal and external stakeholders to ensure complete understanding and alignment with the updated practices.
